For Immediate Release Rye, NH August 25, 2010:

Truslow Resource Consulting in Rye, NH announces its certification as a Women-Owned Enterprise (DBE/WBE) by the New Hampshire Department of Transportation. The company provides groundwater and surface water quality and hydrologic consulting services to municipalities, private clients, agencies, and resource protection organizations. **Danna B. Truslow**, Principal Hydrologist, specializes in water resource management, groundwater-surface water interaction, thermal hydrology, and restoration hydrology. She is a professional geologist in both New Hampshire and Maine and an approved Community Technical Assistance Provider for Piscataqua Region Estuaries Partnership (PREP).

Recent company projects include resource protection consulting for municipalities, stream evaluation and restoration, hydrologic monitoring in an urban watershed, and completion of a comprehensive conservation and management plan for a regional resource protection agency. The company website is www.truslowRC.com.
